

Smart Mosque Platform - Taqwa Framework

Collaborative Framework for Mosque Digitalization

version 1.0.0

license MIT

status Active Development

platform Web Browser

Taqwa: Smart Mosque Platform adalah framework kolaboratif yang dirancang khusus untuk membantu masjid dalam proses digitalisasi yang sistematis, terstruktur, dan berkelanjutan.

Overview

Apa itu Smart Mosque Platform?

Platform ini menyediakan **toolkit lengkap** untuk digitalisasi masjid, mencakup:

-  **Survey Management System** - Pengumpulan data stakeholder
-  **Template Library** - Template siap pakai untuk berbagai kebutuhan
-  **Progress Tracking** - Monitor tahapan digitalisasi
-  **Collaboration Tools** - Koordinasi tim secara real-time

-  **Integration Hub** - Koneksi dengan tools eksternal
-  **Responsive Design** - Optimal di desktop, tablet, dan mobile

Target Pengguna

Stakeholder	Role	Benefit
 Pengurus Masjid	Decision Maker	Strategic planning & oversight
 Jamaah	End User	Voice dalam planning, better services
 Tim IT	Technical Lead	Implementation guidance & tools
 Konsultan	Advisor	Framework & best practices

Key Features

4-Phase Implementation Roadmap

- Phase 1: Persiapan & Planning

[ COMPLETED]
- Phase 2: Data Collection

[ IN PROGRESS – 67%]
- Phase 3: Analysis & Prioritize

[ WAITING]
- Phase 4: Validation & Finalize

[ WAITING]

Comprehensive Survey System

-  **Pengurus Survey:** 40+ pertanyaan tersegmentasi
-  **Jamaah Survey:** 26+ pertanyaan berdasarkan profil
-  **Technical Assessment:** 60+ checklist items
-  **Multi-Storage:** localStorage + sessionStorage + IndexedDB + Auto-export

Template & Tools Library

-  **Quick Setup Wizard** (5 steps, 15 minutes)
-  **Business Model Canvas** (adapted untuk masjid)
-  **Documentation Kit** (requirements, meeting notes, reports)
-  **Technical Checklists** (infrastructure, security, integration)

Real-time Collaboration

- **Live Status:** Who's online, recent activities
- **Progress Sharing:** Real-time updates across team
- **Role Management:** Different access levels (planned)
- **Communication:** Integrated messaging (planned)

Integration Ready

-  **Google Sheets:** Auto-sync survey data
 -  **Email:** Automated notifications & reports
 -  **WhatsApp:** Progress updates & reminders
 -  **Cloud Storage:** Automated backups
 -  **Mobile Apps:** Cross-platform synchronization
-

🔍 Quick Start

1. Setup Requirements

Browser Support

-  Chrome 90+
-  Firefox 88+
-  Safari 14+
-  Edge 90+

Device Compatibility

-  **Desktop/Laptop:** Optimal experience
-  **Tablet:** Fully supported
-  **Mobile:** Responsive design

2. Installation

```
# Option 1: Download & Open
# Download smart-mosque-collaborative-platform.html
# Double-click to open in browser

# Option 2: Local Development
git clone [repository-url]
cd Framework-Smart-Mosque
# Open smart-mosque-collaborative-platform.html in browser

# Option 3: Local Server (Optional)
python -m http.server 3000
# Navigate to http://localhost:3000
```

3. First Steps

1. Open Platform

- Launch `smart-mosque-collaborative-platform.html` in browser
- Wait for welcome notification
- Verify all sections load properly

2. Explore Navigation

- Click through sidebar menu items
- Familiarize with each section
- Test responsive behavior

3. Start Quick Setup

- Go to "📄 Template & Tools"
- Click "🚀 Mulai Quick Setup"
- Follow 5-step wizard

4. **Begin Survey Collection**

- Navigate to " Survey Interaktif"
 - Click " Mulai Survey Baru"
 - Start with pengurus survey
-

Project Structure

Framework-Smart Mosque/	
smart-mosque-collaborative-platform.html	# 🎯 Main Platform
smart-mosque-platform-clean.html	# 🛠️ Clean Template
layout-test.html	# 🧪 Testing Environment

TEAM-DOCUMENTATION.md	# 👥 Team Guidelines
TECHNICAL-DOCUMENTATION.md	# 🔧 Technical Specs
USER-GUIDE.md	# 📖 User Manual
Framework.md	# 📄 Framework Specification
Data & Templates/	
excel/	# 📊 Excel Templates
Framework.docx	# 📄 Word Documentation
React Development/	
src/	# ⚙️ React Source Code
package.json	# 📦 Dependencies
tsconfig.json	# 🔧 TypeScript Config
vite.config.ts	# ⚡ Build Configuration
Assets/ (planned)	
css/	# 🎨 Stylesheets
js/	# 💻 JavaScript Modules
images/	# 🖼️ Images & Icons

2. React App Setup (Development)

📦 Step 1: Install Node.js

1. **Download:** <https://nodejs.org/> (pilih LTS version)

2. **Install** dan restart terminal

3. **Verify:**

```
./verify-nodejs.ps1
```

Step 2: Setup React App

```
# Automated setup
./setup-react.ps1

# Manual setup (alternative)
cd react-app
npm install
npm run dev
```

Step 3: Access Application

- **React App:** <http://localhost:5173/>
- **HTML Platform:** smart-mosque-collaborative-platform.html

Fitur Utama

Platform Web HTML

-  **Process Guide:** Panduan lengkap 4 fase implementasi
-  **Template & Tools:** Kuesioner pengurus, jamaah, teknisi
-  **Survey Interaktif:** Sistem survey real-time
-  **Analysis & Insight:** Dashboard analisis prioritas

-  **Collaboration:** Real-time team collaboration
-  **Integrations:** Koneksi Google Sheets, Email, WhatsApp
-  **Quick Setup Wizard:** Setup masjid dalam 5 langkah

React Application

-  **Modern Tech Stack:** React 18 + TypeScript + Vite
-  **Interactive Components:** Dynamic survey forms
-  **State Management:** Efficient data handling
-  **Responsive Design:** Mobile-first approach

Status Pengembangan

Component	Status	Progress
HTML Platform	 Production Ready	100%
Documentation	 Complete	100%
React App	 Setup Required	80%
Testing	 Manual Testing	90%
Deployment	 Ready	100%

Screenshots

Platform Utama

- Dashboard komprehensif dengan 8 modul utama
- Real-time collaboration tools
- Interactive survey system

Quick Setup Wizard

- 5-step guided setup untuk masjid baru
- Automated configuration
- Professional onboarding experience

Tim & Kontributor

Core Team

- **Ahmad Sulaiman** - Ketua Takmir & Project Lead
- **Siti Hajar** - Bendahara & Content Manager
- **Budi Teknisi** - IT Support & Technical Lead

Stakeholders

- **Dr. Hasan** - Islamic Affairs Consultant
- **Umar** - Technology Vendor
- **Jamaah Representative** - Community Voice

Roadmap

Phase 1: Foundation

-  Stakeholder identification
-  Framework development
-  HTML platform creation

Phase 2: Data Collection (67%)

-  Survey pengurus (80% complete)
-  Survey jamaah (60% complete)
-  Technical assessment (40% complete)

Phase 3: Analysis & Prioritization

-  MoSCoW analysis
-  ROI calculation
-  Feature prioritization

Phase 4: Validation & Finalization

-  Stakeholder presentation
-  Implementation roadmap
-  Go-to-market strategy

Links Penting

-  [Aplikasi Utama](#) - Platform web lengkap

-  **Survey Interaktif** - Sistem survey
-  **Navigasi Cepat** - Quick access ke semua components
-  **Evaluasi Lengkap** - Assessment dan rekomendasi
